

ELECTRIC MARKING MACHINE

JZ115D
Circular Electric Marking Machine

JZ115D Plane Electric Marking Machine

Product Features

- No need to equip with pneumatic supply or computer, built-in programming system with industrial microcomputer and various USB ports.
- Able to mark on wide variety of products or signs made of steel, iron, copper, aluminum, plastic and other material.
- Able to mark in Chinese and English characters, Arabic numbers and any picture with harmonized and aesthetic effects.
- Serial number automatically increasing or decreasing, VIN code, random code and 2D code, etc.
- Key factor is high impact frequency of marking head and fast marking speed making. It's possible for mass production to customers' satisfaction.
- Very small force of marking pin has no influence on the mechanical property of work pieces.
- Marking depth from 0.02~1mm (adjustable), meeting demands for various marking depth.
- Simple operation, easy maintenance.

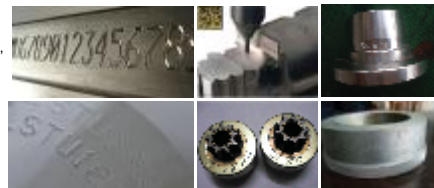

Technical Parameter	
Model	JZ115D
Marking Content	Numbers, Chinese/English characters, graphics
Marking Area	150mm x 100mm
Repetition Accuracy	0.05mm
Marking Depth	0.02-1mm(Adjustable with different material)
Marking Speed	1500-2000mm/Min
Power Supply	AC220V ±10% 50Hz
Power consumption	350W
JZS115D	
Circular Marking	Φ5-100mm (Large circular clamp can be customized)

Non-standard Options

Marking Area	150mmx150mm 200mmx200mm
Circular Marking	Can be customized as user's requirement

Packing Details

Size(mm)	750X530X390 (marking head: 320X440X800, controller:390X380X150)
N.W.(kg)	64(machine: 58, controller: 6)
G.W.(kg)	68

NAMEPLATE/SIGN PNEUMATIC MARKING MACHINE GZB810P (GZB810PA)

Technical Parameter	
Model	GZB810PA
Marking Area	110mm x 80mm
Repetition Accuracy	0.04mm
Marking Depth	0.02-1mm (Adjustable with different material)
Marking Speed	3-5 #3 Characters Per Second Or 40 mm Straight Line
Power Supply	AC220V ±10% 50Hz
Compressed Air	0.3-0.6Mpa
Plate Thickness	0.2-3.0mm
Power Consumption	150W (Not Including Computers And Air Compressor)

Packing Details

Size(mm)	750X530X390 (machine: 330X300X560)
N.W.(kg)	23(machine:23)
G.W.(kg)	27

Product Introduction

- Nameplate Marking Machine is an exclusive product in the series of HBS intelligent pneumatic marking machine, typically designed for marking all kinds of labels. To better serve our customers, this product is designed with the feature of marking small work pieces up to 140mm in height. This added design is to reward our sincere customers for their support.
- Nameplate Marking Machine adopts an integration design, which with light weight and pleasant look, can mark various kinds of labels when directly connected to a computer. To facilitate marking of nameplates, this product is equipped with nameplate clamp for easy loading and unloading, simple, fast and convenient. For manufacturers focusing only on nameplates marking, this product is very economical, saving the troubles of having to re-design the nameplates. It's the machine of your choice for improving on your product quality.

Product Features

- Equipped with nameplate clamp, the marking work can be carries out on both flat surface or circular section that the height of them are no more than 100mm.
- Suitable for manufacturers that require small and medium batch marking or nameplate marking.
- Preview the marking result and View marking process directly simulated on the screen, settings saved in memory automatically, system automatically records marking quantity.
